THE PRE-COATING SPECIALISTS

FRENCH LEADERS IN PRE-COATING

Since Mai 2010, the companies Soprima Industry and Prelok France are associated in order to become **the french leader in the pre-coating field**. Each year we process more than 120 million parts.

Historical actors in the pre-coating industry, Soprima and Prelok combine **more than 50 years of experience** in 4 fields:

- **Locking by bonding:** the threaded parts are locked by a micro-capsulated adhesive which prevents from unscrewing.
- **Locking by polyamide or Tuflok®:** the repositionable locking of threads is obtained by depositing at 180° or at 360° a nylon based patch.
- **Sealing:** the pre-coated resins enable to seal screwed assemblies, hafted assemblies or mounted assemblies.
- **Anti-seize:** the deposited varnishes on threads avoid phenomena like jamming during screwing or under extreme conditions.

Our knowledge, previously oriented to automotive industries, is today accessible for any industry. **We process the smallest series (some thousand parts) but also the largest series (several million of parts).**

		Micro-screws < M2	Small screws M2-M5	Standard screws > M5	Socket screws	Nuts	Under head coating	Plugs & connectors	Inserts	Axes and studs	Special parts		
Type of parts												Type of parts	
SOPRIMA	Locking by bonding			Lots < 30 000									Locking by bonding
	Locking by Polyamide												Locking by Polyamide
	Sealing						Under-head						Sealing
	Anti-seizing												Anti-seizing
PRELOK (ex PSM)	Locking by bonding			> 30 000				> 20 000					Locking by bonding
	Tuflok®												Tuflok®
	Sealing			> 30 000									Sealing
	Anti-seizing			> 30 000	> 30 000	> 30 000		> 20 000	> 20 000	> 20 000	> 20 000	> 20 000	Anti-seizing

PRODUCT FOR PRE-COATING

Suppliers	Locking by bonding	Sealing	Locking by polyamide	Anti-seizing
	3M 2353	TB 2353	Tuflok 180°	Precote 709
	3M 2510	3M 4291	Tuflok 360°	TNT I5
	Precote 30	Precote 5	Precote 10-I	Teflon
	Precote 80	Precote 15	Nytemp	Nytorq
	Precote 85	Precote 200		

QUALITY

Our production sites are ISO 9001 certified and fulfill specific requirements in the automotive industry.

OUR PRODUCTION MEANS

We dispose of 10 different processes and more than 30 machines to fulfill all your needs, from the smallest to the largest automotive series.

SOPRIMA	PRELOK
15 brushing machines	1 strip CS8
5 micro-screw machines (S0.7 to M3)	1 high rate rotative machines
3 nut coating machines	2 magnetic coating machines
1 dipping process installation	1 rotary Tuflok® line
1 Precote 200 machine	1 Tuflok® line

CONTACT ADDRESS

■ SOPRIMA INDUSTRIE

18, rue Paul Painlevé – Parc du Vert Galant
 BP 57015 – 95050 Cergy Pontoise
